Adhesive:

Tight Melt 9005 is a hot melt adhesive for packaging industries.

Field of Application:

Packaging

Application:

Tight Melt 9005 is applied with wheel, roller or nozzle application systems at 170°C to 180°C.

Characteristics:

Thermoplastic Hot Melt adhesive, 100% solid content, appropriate adhesion and cohesion.

Specification:

Properties	Specification	Test Method
Base	Olefins	-
Color	yellow	Observation
Softening Point	99±1°C	ASTM-E28 (R&B)
Viscosity	Following Curve	Viscometer*

* Brookfield Viscometer LVT Spindle #34

Physical Properties:

Tight Melt 9005 has been designed especially for usage in adhesion of PP, PE and OPP substrains. Tight Melt 9005 is a pressure sensitive adhesive which has been enriched by different types of Styrene Copolymers. Due to appropriate tackifying agents, Tight Melt 9005 benefits from high tackness and heat resistance.

Storage Condition:

Do not store in high temperature.

Viscosity Curve:

Instructions:

The recommended temperatures must not be exceeded for a longer period as such action is damaging to the adhesives. The usual precautionary measures have to be taken when handling chemical products. This includes ample ventilation of the work area, particularly when larger quantities are processed.

Important Notes:

The particulars of this data sheet are based on our present knowledge and experience. Each user is obligated to test this product with original materials under actual application conditions before final use. We do not take responsibility for damages during application for which the product is not intended. Our data sheet cannot be considered legally binding in the case of certain material or suitability for all applications. Rules and regulations in each country have to be taken into consideration and we cannot be held responsible for local regulations unknown to us. In case of doubt, please consult us.
